Town of Due West reserves the right to reject any and all submissions or any parts thereof and to waive any irregularities or minor informalities in any submission or in the procurement process and to make a contract award in the best interest of the Town of Due West.

This project is being funded in whole or in part by the South Carolina Infrastructure Investment Program (SCIIP), which is administered by the South Carolina Rural Infrastructure Authority (RIA) and funded by federal State and Local Fiscal Recovery Funds (SLFRF) through the American Rescue Plan Act (ARPA). All federal SLFRF requirements and SCIIP requirements will apply to the contract. All contractors and subcontractors are required to be registered in the federal System for Award Management (SAM) and may not be debarred from doing business with the federal government. Respondents on this work will be required to comply with all applicable federal regulations, including those listed in Exhibit A.

1. INTRODUCTION

Town of Due West is issuing this Request for Qualifications (RFQ) to identify a qualified civil engineer to provide a full range of engineering services to support the implementation of the Wastewater Treatment Plant Upgrades. These services will be provided under contract with the Town of Due West, with funding provided by the South Carolina Rural Infrastructure Authority (RIA) through the South Carolina Infrastructure Investment Program (SCIIP) under SCIIP Grant #A-23-C057 and RIA State Grant #R-22-1325.

1.1. Method of Procurement

This is a qualifications-based selection. Award will be given to the most responsible, responsive and most highly-qualified engineering firm based on the factors outlined in Section 5, SELECTION CRITERIA. Cost is NOT a factor in the ranking of firms to provide services herein. DO NOT include any reference to consultant costs in the RFQ response. Any RFQ response with any discussion of cost will be disqualified. Contract fees will be negotiated after selection based on the project scope. A general scope of work is outlined below.

Firms are advised that this evaluation and selection process is a competition and not simply a prequalification. It is the intent of the Town of Due West to award the contract to a single Firm.

1.2. Project Description

The portion of work already funded by R-22-1325 will consist only of abandoning the existing headworks structure and re-routing some on-site gravity sewer in order to install a new packaged headworks unit, including a mechanical bar screen and grit removal system. This RIA State-funded portion of the project is currently in the design phase.

SCIIP funding will only be used to complete the following:

- The existing gas chlorine system will be abandoned and replaced with a more user friendly, liquid chemical feed system for chlorination and dechlorination. Each of these systems will include skid-mounted peristaltic metering pumps and all associated valves, piping, and storage tanks.
- A liquid lime system will be added at the WWTP (in lieu of hand-mixing lime slurry) that will include a storage tank and mixer along with enclosed, skid-mounted peristaltic metering pumps and all associated valves, piping, and injection quill.
- Two (2) additional concrete "truck tracks" will be added to each of the two (2) sludge drying beds to facilitate ease of operation and full use of the drying beds.
- The aeration chamber will be drained and the existing walls will be cleaned and recoated with an epoxy system to extend the overall useful life of the treatment unit.
- Other miscellaneous items that will be required include demolition of old structures, bypass pumping and/or pump & haul efforts, electrical, and general site work related to preparing for new structures and restoration of disturbed areas.

The application for SCIIP funding, which includes a detailed project description as well as preliminary engineering information, can be found here. <https://duewestsc.com/wp-content/uploads/2023/06/SCIIP-Application.pdf>
